v.1

In 1969, every man, woman and child stood still, **face to the sky**

We watched an earthly son put our first steps, **on the moon**

In that fleeting point in time, we all belonged to one tribe

Inspired, by what human minds, combined can do

Yet we're just one form of life, blessed to share the same light

Of the sun, **at the earth rise**

Only the size of the thumb, of that man, looking back

To his home, all alone, from the moon

CHORUS 1:

What's the next giant leap for humankind?

What kind of footprint do we leave behind?

Will the next giant leap, be the best giant leap

For all earthkind?

v.2

Now 50 years have gone, and the stakes are higher than the moon

We race now with time

To heed the earth's distress, we need to curb excess

Or be consumed, by her rising angry tide

But when we reached for the moon, we saw what we could all do

With our minds, when we combine, to find a way through

Cos it's just not rocket science, to understand our reliance

Oo

Oo

On the sun, **earth, sea and skies**

It's our moment **in time**

All for one

We've already begun

CHORUS 2

From one small step by a child,
To one bigger step, for our world to re-wild
The path will be steep, to the next giant leap, for all earth kind

CHORUS 3

Take the next giant leap for earth **kind**
With one giant beat of our **hearts and our minds**
Make the next giant leap, the best giant leap, for all earth kind

BRIDGE: **(For all Earthkind, for all Earthkind)**

In 2069, what will history's line have to say, about what you did today
Ah, ah, ah, ah. **AHHHH**
